### Orthopedic Bracing Solutions

Specializing in custom-made pediatric and adult orthotic devices.

## WHO WE ARE

Established in 1997, Orthopedic Bracing Solutions Inc. provides orthotic services to improve the mobility and function of patients with pathomechanical and/or neuromuscular conditions.

Our team is made up of Certified Orthotists C.O.(c) and Registered Orthotic Technicians R.T.O.(c) regulated by Orthotics Prosthetics Canada (OPC). We are specially trained and educated in the assessment, design, fabrication, fitting and continued management of custom orthoses.

## WHAT ARE ORTHOTICS?

Orthotics are externally applied devices used to align, protect and/or support the body.

## THE PURPOSE OF ORTHOTICS

- Relieve pain
- Manage/compensate for deformities
- Prevent excessive joint range of motion
- Increase joint range of motion
- Protection
- Promote healing and off-load pressure
- Improve quality of life through enhanced mobility, function and comfort
